Saturday, September 27, 10–5pm

The CAVE is located in the Engineering Research Facility Building at 842 West Taylor Street. Reservations are being taken through the Electronic Visualization Laboratory at 312-996-3002.

*Virtual Spaces* is an exhibition of interactive virtual reality and electronic art created by the Electronic Visualization Laboratory at the University of Illinois at Chicago. *Virtual Spaces* presents new levels of exploration through the use of immersive electronic media. The works on display are designed for the CAVE, the Automated Virtual Reality Environment, and the ImmersaDesk system. These virtual reality systems allow participants to explore and manipulate real-time computer-generated environments. Photography and interactive video and performance will also be exhibited.

This exhibition is held in conjunction with ISEA97, the eighth International Symposium on Electronic Art, organized by the Inter-Society for the Electronic Arts.
